Certifications

Meta Front-End Developer
Specialization

Bartosz Stefaniak

Full-stack Software Engineer | TypeScript, React, Next.js, Node.js, Nest.js

Wieluń, Woj. Łódzkie, Polska

Podsumowanie

Full-stack TypeScript developer with commercial experience since 2021. I build web products end to end, from React and Next.js interfaces to Node.js and Nest.js APIs, relational databases, integrations and AWS services. My experience includes learning and certification platforms, e-commerce and specialist business applications. In my current work, I develop multi-tenant certification systems, including automated exam validation, certificate generation, database performance and admin and learner workflows. I have also built and extended Next.js storefronts with payment, inventory and third-party API integrations. I'm open to Full-stack TypeScript roles, with Frontend TypeScript as a secondary option, preferably remote from Poland. I enjoy owning a feature from the user problem and interface through API, data, testing and delivery. Core stack: TypeScript, React, Next.js, Node.js, NestJS, PostgreSQL, Prisma, Redis, AWS. Portfolio: TBD. Contact: barth.webdesign@gmail.com

Doświadczenie

From Poland With Dev

Fullstack Developer

listopada 2024 - Present (2 lata)

- Built end-to-end features for corporate learning and certification platforms using TypeScript, React/Next.js, Node.js/NestJS, and relational databases.
- Developed core workflows including automated exam validation, multi-tenant functionality, and dynamic certificate generation.
- Owned delivery across frontend interfaces, backend services, database logic, integrations, and automated tests.
- Improved database-query efficiency and application responsiveness during high-traffic certification periods.
- Worked with QA, Product Owners, and system architects to deliver and review production features.

Własna

Freelancer

sierpnia 2021 - Present (5 lat 3 mies.)

- Delivered websites and small web applications for freelance clients.
- Handled development alongside selected UI, brand-identity, and graphic-design work.

Divstack

1 rok 6 mies.

Software Engineer (JavaScript / TypeScript)

stycznia 2024 - lipca 2024 (7 mies.)

Rzeszów

Client Project: IT Spark

- Built and extended Next.js e-commerce storefronts for client-specific requirements.
- Integrated payment, inventory-management, and other third-party services.
- Implemented responsive interfaces and technical SEO improvements.
- Worked with backend developers to ensure consistent data flow and application performance.

Software Engineer (JavaScript / TypeScript)

lutego 2023 - lipca 2024 (1 rok 6 mies.)

Rzeszów

Developed and maintained e-commerce websites and business web applications using JavaScript and TypeScript.

- Implemented responsive interfaces and improved application performance across devices.
- Worked with design and backend teams to deliver client-specific features.

Software Engineer (Javascript / Typescript)

lutego 2023 - stycznia 2024 (1 rok)

Rzeszów, Woj. Podkarpackie, Polska

Client Project: Cetus Pro

- Developed a specialist web application for managing pigeon lofts, genealogy, health, and performance data.
- Built real-time tracking and analytics workflows for breeders.
- Integrated race tracking, pedigree-management, and automated-notification APIs.
- Tested and debugged complex workflows to improve reliability and data accuracy.

NestCode

Software Engineer (JavaScript / TypeScript)

września 2022 - czerwca 2023 (10 mies.)

- Creating e-commerce solutions (mostly) with Next.js and Prisma
- Maintenance of existing websites
- Graphic design
